

Welcome to npi electronic

- We build amplifiers since 1984.
- We develop and produce our instruments in Germany. These include a wide range of amplifiers, isolated stimulators, devices for precise substance application, temperature controllers (see our [Product Overview](#)).
- We provide complete setups for electrophysiology, imaging and optogenetics – *in vivo* and *in vitro*.
- We support you with design and installation.
- We supply various kinds of micromanipulators and perfusion systems.
- We provide peripheral equipment like pullers, slicers and Faraday cages.

Open position - Application scientist

npi electronic is looking for an **Application Scientist** to complement our team.

See this [advertisement](#) for more detailed information.

npi electronic is part of the European Training Network EU-GliaPhD
